Education

09.2007 - 07.2013
Mittlere Reife
Tulla-Realschule Karlsruhe

02.2022 - 02.2023
Full Stack Web Developer
Digital Career Institute

Skills

- Full Stack Web Development
- Teamwork
- Problemsolving
- Learning / Adapting
- Customerfocus
- Reflecting

Language

- **English**
- **German**

Experience

2022 - 2023
Digital Career Institute

At the DCI I attended a full time Web Developer course learning about HTML, CSS, SCSS, JS, TS, React, Node, Mongo DB, Git, npm and Linux,

After each module we had time to work our own project to present to the class what we have learned. This was the best part for me and I can say that I always tried to challenge myself either with the project itself or the ideas I implemented.

Since my last project I have gained experience developing as a team as well. For the backend module we planned and created a full stack web application instead (flightconnect), This was the most challenging and also most fun project so far.

 I am confident in my ability to and learn and overcome and can't wait to learn more while working on real products.

2012 - 2022
Gastronomy

Over 10 years I have gathered valuable experience working in many small and big restaurants, starting in the kitchen at the age of 15 and transitioning to bar and service later.

In this time I've seen a lot of different perspectives of the whole picture and besides learning the positions themselves and working with customers, I learned to have empathy even under pressure and to think not only for myself and my guests or work but also for my colleagues and theirs.

I had the chance to work on bigger events like weddings and new years where i took the responsibility for a floor or section of the restaurant and the staff working there.

Projects

flightconnect.dev

Mongo DB, Express, React, Node
(turn off ad-block)
